

UCDoor

Representative Video Lobby solution for outdoor and indoor use

Description

- Audio/Video door intercom with one-way video
- For outdoor and lobby environments
- Intuitive touchscreen
- Door opener via Lync™ or via soft-keypad with customizable GUI
- Direct connection to Lync, no gateway needed
- Available in different sizes
- GUI, Logos and ringtones can be adapted to unique corporate identity

Package contents

- Software package with Windows, Microsoft Lync and example program for door opener with preconfigured ring button connected to Lync™ (Microsoft Lync CAL not included!)
- Includes: Software development Kit for Microsoft Visual Studio for customization of the GUI design

UCDoor

Technical Details

- Integration with Lync directly via Lync Client SDK
- UCDoor SDK contains source code of example program with ringing and door opener function
- Typically at least 2 Lync contacts have to be created, one for UCDoor and one as proxy for a Lync team call group or response group
- Duration of ringing can be configured (Default 20 s)
- Ringing state is signalled in orange, after timeout a message is displayed
- Predefined keywords trigger the door opener and the button color (green: door open, red: rejected)
- Configurable opening interval (Default 10 s)

Prerequisites

- Lync 2010 or 2013 Server
- Lync Client CALs voice enabled for number of UCDoor systems
- For mounting in letterbox, wall box or on pillar for lobby environment
- LAN/Ethernet required
- WLAN Connection possible with optional USB adapter
- Connector for external loudspeaker available

Kompatibility

Lync 2010

Lync 2013
